(54) Title: **PRODUCT INVENTORY MANAGEMENT SYSTEM**

(57) Abstract: A system to facilitate bookings including at least one business centre, each business centre having at least one product available for booking, wherein each business centre includes a first processing means for receiving and making bookings of at least one product from at least one agent or customer; and a central data centre including a second processing means for receiving and making bookings of at least one product from at least one agent or customer or at least one other agent or customer; wherein at one or more predetermined periods or actions one first and second processing means are synchronised so that booking information in the first and second processing means is the same.
